

NX0392 3 buttons and RFID reader flush mounted module

Description

The three illuminated buttons allow trigger calls demanding help, urgent and medical alarm, and record the presence of staff in the rooms by pressing the green button.

It has 3 function keys:

- Red: to generate alarms
- Green: presence of medical personnel and call drop
- Blue: medical alarm

The key light signaling indicates the alarm status and the presence of staff in the room.

NX0392 model includes an RFID card reader to facilitate the registration of staff presence.

They act as a peripheral in RS485 bus that communicates with Helpnex room terminals.

It is wired through UTP to the bus (1 pair for power and 1 pair for RS485).

Features

- 3 illuminated keys with tactile and audible feedback
- Acoustic signaling
- Communication with room terminal: RS485 bus.
- RFID: 125kHz only reading.
- Measures 44 x 44 x 46 mm

Power

- Nominal 12Vdc. Maximum 15Vdc. Minimum 9Vdc.
- Consumption (NX0392/NX0394): maximum 57/50mA; in standby 22/15mA

Functionalities

- Normal call
- Urgent call
- Doctor call
- Cancel attentions
- Nurse presence
- To register room presence through the RFID reader
